

SeekBar 的用法

```
<SeekBar
    android:id="@+id/seekBar"
    android:max="20"
    android:progress="0"
    android:layout_marginTop="12dp"
    android:layout_width="match_parent"
    android:layout_height="wrap_content" />
```

max //控制最大值
progress //控制當前值

SeekBar 的值改變時事件

```
seekBar.setOnSeekBarChangeListener( object :  
SeekBar.OnSeekBarChangeListener {  
    override fun onProgressChanged(  
        p0: SeekBar?,  
        progress: Int,  
        p2: Boolean  
    ) {  
        textView.text = progress.toString()  
    }  
  
    override fun onStartTrackingTouch(p0: SeekBar?) {  
    }  
  
    override fun onStopTrackingTouch(p0: SeekBar?) {  
    }  
  
})
```
